Bookmatch and fourmatch

BookMatch stones are two slabs. They are connected together to create a beautiful symmetrical pattern. In addition, you often see them in luxury places

Book matching occurs when two or more natural or engineered stone slabs are mirrored to match the pattern, movement, and veining found in the material.

Marble

Marble is one of the first choices for designing the interior of a building. It in any color adapts to the environment and uses in all kinds of decorations.

Also, marble is a wonderful example of the beauty that nature can produce. It's relatively soft, and that means it is easy to carve and create smooth curves and shapes that would be very difficult in harder tones like granite.

Application of marble stone:

- Landscaping
- Building facades
- Inner wall
- Kitchen counter

The following analysis table has been prepared based on ASTM standard indices for selecting the appropriate Marble for various purposes.
