Description:

Our credit is our most important capital. Be sure of the quality and price. We always strive for customer satisfaction.

The price range means that the stones are sorted. This sorting is only based on the pattern and beauty of the stone, which includes 4 grades (A+, A, B, C). But in fact, the quality of the stone does not make a difference.

The durability and beauty of the stone is very much related to its application. The sign (✓) means the desired use and the sign (*) means the conditional use.

The above prices do not include the cost of packaging.

The above prices are based on delivery to the door of the factory in the center of Iran. Of course, we can deliver your order anywhere in the world.

The considered standard thickness is equal to 20 (±1) mm. If you request to change the size, the prices will also change.

In case of a large volume purchase order, the above rates will be adjusted.

Our specialists are ready to advise you through WhatsApp (+374 93 994318).
